Summary

Final-term Business Information Systems student at UEL – VNU-HCM (Digital Business & AI track; coursework complete Nov 2026, degree conferral June 2027). Hands-on builder of automation workflows (n8n) and applied AI systems (RAG, GenBI chatbots, ML pipelines). Comfortable working across SQL/Python data tooling and eager to extend that automation mindset into Microsoft Power Platform and Copilot Studio.

Technical Skills

- **AI & Automation:** n8n workflow automation, LLM/GenAI integration (Groq Llama 3)
- **Data & Databases:** SQL (PostgreSQL, DuckDB), Excel (data cleaning & analysis), data modeling, data quality testing (PyDeequ)
- **Pipeline & Orchestration:** dbt, Apache Airflow, Apache Kafka/Spark, Docker
- **Programming & Tools:** Python (pandas, scikit-learn), Git

Experience

Data Engineering Practicum Student - ShopBack Apr – May 2026
Academic Practicum Program

- Configured a PostgreSQL CDC source via Debezium WAL, streaming row-level changes through Kafka into MinIO-backed Parquet files using Apache Spark.
- Integrated PyDeequ data-quality checks across 4 tables and wired PagerDuty/Grafana for automated tiered alerting — direct experience monitoring automation performance and flagging issues.

Key Projects

IDSS: Offline Intelligent Decision Support System (AI Agent / TS-RAG) Mar – Apr 2026
AI & Decision Support Course

- Built a fully offline AI decision-support agent for retail/logistics using Hash N-gram/TF-IDF retrieval (FAISS-CPU) feeding a Rule-Based Expert System, replacing a LangChain + OpenAI dependency.
- Every recommendation is auditable: key drivers, risk flags, confidence score (65–85%), and a JSONL audit trail for UAT verification.
- *[Repo: github.com/TrongLeBa111/AI$_m$uti]*

Agricultural Price Data Warehouse – GenBI Chatbot & Automated Pipeline Jan – Jun 2026
Data Warehouse Course – Co-developed with team

- Orchestrated a daily automated Airflow DAG (ingest → dbt run → dbt test → ML scoring) triggered by GitHub Actions with zero manual intervention.
- Built a Groq Llama 3 GenBI chatbot for querying market data in natural Vietnamese, paired with an LSTM forecasting dashboard (MAPE 1.12–1.55%).
- *[Repo: github.com/LeGiaVan/agri-price-dwh]*

Marketing Automation & Real-Time Sentiment Analysis Dec 2025 – Mar 2026
School Group Project – Dongtay Promotion

- Designed an automated n8n workflow scraping YouTube metrics/comments and triggering Hugging Face sentiment analysis - cut manual data collection time by 80% (20 hrs → 4 hrs/week) and shifted reporting from weekly to hourly.
- Directly applicable to Power Automate-style business process automation workflows.

E-commerce End-to-End Analytics Pipeline Oct 2025 – Present
Personal Project

- Built a 3-layer pipeline (PostgreSQL → dbt Bronze/Silver/Gold → Airflow) transforming 650k+ transactions into a Star Schema with 16 automated data-quality tests; trained a LightGBM churn model (ROC-AUC 0.738).
- *[Repo: github.com/TrongLeBa111/E-commerce-Analytics-Pipeline]*

Education

University of Economics & Law (UEL) – VNU-HCM Coursework complete Nov 2026 · Degree June 2027
Bachelor of Business Information Management – Digital Business & AI
GPA: 8.34/10

Certifications & Continuous Learning

- Google Generative AI Essentials (2026) | Google Data Analytics Professional Certificate (In Progress)
- TOEIC Reading and Listening – 640 (2025) | Self-studying Microsoft Power Automate & Copilot Studio fundamentals
