Summary

Final-term Business Information Management student at UEL – VNU-HCM (GPA: 8.34/10; coursework complete Nov 2026, degree conferral June 2027). Hands-on experience in requirements gathering, process modeling (BPMN 2.0/DFD), user story specification, and cross-functional coordination. Combines product-thinking and UI/UX design with technical literacy in data analysis and full-cycle web systems.

Technical Skills

- **Business Analysis & Modeling:** Requirements gathering, User Stories, Acceptance Criteria, BPMN 2.0, DFD decomposition, Use Cases, Traceability Matrix, Stakeholder Analysis
- **Product & Design:** Figma (Wireframing, Prototyping, Design Tokens), User Flow Mapping, Sitemap, Information Architecture
- **Data & Technical Tools:** SQL, Python (data analysis), Excel/Sheets, Git, React 18, FastAPI, SQLite

Experience

Data Engineering Practicum Student — ShopBack Apr – May 2026
Academic Practicum Program

- Collaborated with control tower and data pipeline teams to analyze operational requirements, data governance workflows, and cross-team SLAs — building foundational stakeholder and operational BA competencies.

Key Projects

THỔ Studio — E-Commerce & Workshop Booking Platform 2025 – 2026
Full-Stack Product Project

- Elicited requirements for ceramic studio digitalization: structured 2 core subsystems (Storefront and Admin Dashboard) serving 4 user roles.
- Built complete product specs: 15+ page sitemap, end-to-end Figma wireframes (booking, checkout, tracking), and cohesive design tokens.
- Documented workflows via BPMN 2.0, DFD, and 6 detailed use cases; translated pain points into solutions including a hybrid cart system and a 7-stage ceramic production tracker (Shaping → Firing → Glazing → QC → Shipping).
- Designed an AI chatbot workflow collecting customer preferences to recommend workshops and pipe data directly to artisans. | *Demo: phatrienwebkinhdoanh-vylr.vercel.app]*

UNI-BRIDGE — Student–Business Project Marketplace System Dec 2025 – Mar 2026
Systems Analysis & Design Course – Team Lead

- Led stakeholder interviews across 4 user groups (students, enterprises, faculty, admins); synthesized 50+ functional/non-functional requirements with a full traceability matrix.
- Modeled BPMN processes, DFD, sequence diagrams, ERD, and interactive Figma UI prototypes for stakeholder UAT validation.

E-commerce End-to-End Analytics Pipeline Oct 2025 – Present
Personal Project

- Analyzed 650,000+ transaction records to uncover operational bottlenecks: identified a 97% one-time customer rate and pinpointed delivery delays (>14 days) dropping review scores from 4.2 to 3.1, delivering actionable product improvement recommendations. *[Repo: github.com/TrongLeBa111/E-commerce-Analytics-Pipeline]*

Agricultural Price Analysis & Data Visual Analytics Data Analyst
Academic Project – Data Warehouse
Jan 2026 – Jun 2026

• Modeled and standardized an agricultural market data warehouse extracting from multi-format data points using a Medallion architecture combined with dbt/SQL for clean transformations.

• **Dashboard User Experience:** Designed an interactive analytical dashboard allowing management to intuitively track market variance, pricing directions via moving averages, and structural variations. Embedded a GenBI chatbot enabling natural language data querying.

Education

University of Economics & Law (UEL) – VNU-HCM Coursework complete Nov 2026 · Degree June 2027
Bachelor of Business Information Management – Digital Business & AI
GPA: 8.34/10

Certifications & Skills

- Google Generative AI Essentials (2026) | Google Data Analytics Professional Certificate (In Progress)
- TOEIC Reading and Listening – 640 (2025) | Proficient in BPMN Process Modeling & Figma Prototyping
