PROFESSIONAL SUMMARY

Business Information Systems student specializing in Digital Business & AI at UEL–VNU-HCM. Experienced in building and deploying end-to-end data and analytics pipelines: extracting real-time metrics, engineering data quality validation frameworks, and automating corporate reporting workflows using n8n and Python. Skilled in designing interactive dashboards and extracting business insights to facilitate data-driven decision-making.

SKILLS

Visualization & Reporting: Advanced Excel/Google Sheets (Pivot Tables, Complex Formulas), Power BI, Looker Studio, Streamlit Dashboards, Matplotlib/Seaborn.
Data Processing & Cleaning: Python (pandas, numpy), SQL (PostgreSQL, DuckDB), PyDeequ (Automated Data Quality Profiling).
Automation & Architecture: n8n Automation, dbt (Data Transformation), Apache Airflow, Telegram Bot API, Docker, Git.
Analytical Competencies: Metric Tracking & KPI Analytics, Target Segmentation (RFM/Cohort), Trend Analysis, Reporting Workflow Optimization.

EXTRACURRICULAR EXPERIENCE

ShopBack *Ho Chi Minh City, Vietnam*
Technology Practicum – Data Engineering *Apr 2026 – May 2026*

- Participated in data pipeline optimization tracks, building automated ETL components to funnel cross-functional data sources into centralized data storage for comprehensive corporate reporting.
- **Data Quality Assurance:** Deployed automated data validating frameworks using **PyDeequ** across core transaction tables (validating null fields, uniqueness constraints, and data type integrity), ensuring 100% metric reliability prior to BI ingestion.

KEY PROJECTS

Agricultural Price Analysis & Data Visual Analytics *Academic Project – Data Warehouse*
Data Analyst *Jan 2026 – Jun 2026*

- Modeled and standardized an agricultural market data warehouse extracting from multi-format data points using a Medallion architecture combined with dbt/SQL for clean transformations.
- **Dashboard User Experience:** Designed an interactive analytical dashboard allowing management to intuitively track market variance, pricing directions via moving averages, and structural variations. Embedded a GenBI chatbot enabling natural language data querying.

E-commerce End-to-End Data Pipeline & Business Insights *Personal Project*
Data/Business Analyst *Oct 2025 – Present*

- Processed and structured a retail business dataset containing 650k+ raw inputs utilizing a Star Schema structure optimized for analytical reporting speed.
- Executed comprehensive RFM segmentation across 99k+ unique customers; isolated a critical business insight establishing a strict correlation between extended delivery latency ($>$ 14 days) and sharp drops in consumer satisfaction scores (from 4.2 down to 3.1).

Dongtay Promotion – DatVietVAC Group *Ho Chi Minh City, Vietnam*
Corporate Project – Data & Marketing Analytics *Dec 2025 – Mar 2026*

- Conducted Exploratory Data Analysis (EDA) on extensive marketing datasets to profile audience behavioral trends and evaluate overall content engagement metrics.
- **Reporting Workflow Optimization:** Engineered automated data pipelines using **n8n** to retrieve real-time performance indicators via APIs, **reducing manual data aggregation time and operational effort by 80%**.
- Integrated NLP sentiment models (Hugging Face) to evaluate user sentiment, converting analytical findings into clear visualizations to support strategic content adjustments for the marketing team.
- Drafted comprehensive technical documentation describing data flows and output schemas for non-technical product and operational teams.

EDUCATION

University of Economics and Law – VNU-HCM *Ho Chi Minh City, Vietnam*
Bachelor of Business Information Systems – Digital Business & AI *Expected: 2027*

- **GPA: 8.35/10** | Coursework: Data & Visual Analytics, Machine Learning, Data Warehouse, Database Management Systems, Systems Analysis & Design, Digital Marketing Analytics.
