About Me

Final-year Business Information Management student interested in making business operations more efficient through data and automation. In academic and personal projects, I have built automated data workflows, improved recurring reporting, and documented business requirements. A marketing reporting project reduced manual data collection time by 80%, reinforcing my interest in practical process improvement. I hope to support BPCE's reporting and internal automation initiatives while learning to deliver reliable solutions in a banking environment.

Relevant Skills

- **Automation & Integration:** n8n, Apache Airflow, REST APIs, ETL/ELT, dbt, GitHub Actions.
- **Data & Reporting:** SQL (PostgreSQL), Python (pandas), Power BI, Microsoft Excel, data validation.
- **Business Analysis:** Requirements gathering, process mapping, stakeholder coordination, documentation.
- **Internal Tools & AI:** Streamlit, LLM-assisted data querying, Git/GitHub.

Experience

ShopBack — Data Engineering Practicum Apr – May 2026

Academic Industry Program

- Built a practice CDC workflow (PostgreSQL, Debezium, Kafka, Spark) to move transaction data into Parquet storage.
- Applied PyDeequ quality checks across four tables and configured Grafana/PagerDuty monitoring and alerts.

Selected Projects

Dongtay Promotion — Marketing Reporting Automation Dec 2025 – Mar 2026

University-Extended Project

- Automated YouTube metrics and comment collection using n8n and APIs; reduced manual collection from 20 to 4 hours per week (80%).
- Applied sentiment analysis to audience feedback to support recurring marketing reports and insights.

E-commerce Analytics Pipeline & Business Reporting Oct 2025 – Present

Personal Project

- Processed 650k+ transactions using SQL, Python, and dbt; built a three-layer data pipeline with 16 automated data-quality tests.
- Analyzed customer retention and delivery performance; orders delayed over 14 days had average ratings of 3.1 versus 4.2.

E-commerce Analytics — GitHub Repository

UNI-BRIDGE — Requirements & Project Documentation Dec 2025 – Mar 2026

System Analysis & Design Project — Team Lead

- Gathered needs from four stakeholder groups and documented 50+ functional and non-functional requirements.
- Coordinated project activities; prepared process diagrams, specifications, and a Figma prototype for review.

Education

University of Economics and Law (UEL) — VNU-HCM Expected Jun 2027

Bachelor of Business Information Management — Digital Business & AI

GPA: 8.34/10 | Coursework: Systems Analysis & Design, Data Warehouse, Data & Visual Analytics.

Certifications & Languages

- Google Generative AI Essentials (2026) | Google Data Analytics Professional Certificate (In Progress)
- TOEIC Listening & Reading: 640 (2025)
