About Me

Final-year Business Information Management student focused on improving operational efficiency through data processing and workflow automation. Practical experience includes designing recurring data pipelines, establishing data quality assertions, and documenting functional requirements for cross-functional teams. Seeking to contribute to reporting and internal automation initiatives by applying structured problem-solving and technical execution in a professional environment.

Relevant Skills

- **Automation & Integration:** n8n, Apache Airflow, REST APIs, ETL/ELT pipelines, dbt Core, GitHub Actions.
- **Data Reporting:** SQL (PostgreSQL), Python (pandas), Power BI, Microsoft Excel, data validation frameworks.
- **Business Analysis:** Requirements gathering, process mapping (BPMN), stakeholder coordination, functional documentation.
- **Internal Tools & Collaboration:** Streamlit, LLM-assisted data querying interfaces, Git, Docker containerization.

Experience

ShopBack — Data Engineering Practicum Apr – May 2026
Academic Industry Program

- Contributed to the development of a change data capture (CDC) workflow leveraging PostgreSQL, Debezium, Apache Kafka, and Apache Spark to ingest transactional records into Parquet storage formats.
- Implemented automated data quality validation rules using PyDeequ across four core tables, verifying primary key uniqueness, null constraints, and value ranges prior to downstream ingestion.
- Configured monitoring dashboards in Grafana and alert channels via PagerDuty to track replication latency and identify ingestion anomalies.

Projects

Dongtay Promotion — Marketing Reporting Automation Dec 2025 – Mar 2026
University-Extended Project

- Engineered an automated workflow using n8n and REST APIs to periodically aggregate YouTube engagement metrics and audience commentary, decreasing manual reporting compilation time from 20 to 4 hours weekly (80% reduction).
- Integrated Hugging Face natural language processing models to classify audience sentiment trends, delivering structured qualitative insights to support recurring marketing evaluation meetings.

E-commerce Business Analytics & Customer Retention Oct 2025 – Present
Personal Project

- Analyzed behavioral patterns across more than 650,000 e-commerce transactions using SQL and Python to evaluate customer lifecycle metrics, repeat purchase rates, and revenue drivers.
- Conducted customer retention and delivery performance analyses, identifying that delivery delays exceeding 14 days corresponded with a drop in average customer review ratings from 4.2 to 3.1 stars, informing operational adjustment recommendations.

UNI-BRIDGE — Requirements & Project Documentation Dec 2025 – Mar 2026
System Analysis & Design Project — Team Lead

- Led structured interviews with four distinct stakeholder groups to elicit, analyze, and specify over 50 functional and non-functional requirements.
- Synthesized findings into comprehensive process flow diagrams, data dictionaries, and an interactive Figma prototype utilized during stakeholder review sessions.

Education

University of Economics and Law (UEL) — VNU-HCM Expected Jun 2027
Bachelor of Business Information Management — Digital Business & AI
GPA: 8.34/10 | Relevant Coursework: Systems Analysis & Design, Data Warehouse, Database Management, Business Analysis.

Certifications & Languages

- Google Generative AI Essentials (2026) | Google Data Analytics Professional Certificate (In Progress)
- TOEIC Listening & Reading: 640 (2025)
