Profile

Final-year Business Information Management student at UEL–VNU-HCM (GPA 8.34/10), with hands-on experience in requirements analysis, product design, and software testing. Led an end-to-end product project from stakeholder interviews to a deployed web demo, covering use cases, process models, UI design, and test execution. Eager to learn software development practices and work with global product teams.

Skills

- **Requirements & Analysis:** requirements elicitation, functional and non-functional requirements, user stories and acceptance criteria, use case specification, traceability matrix, stakeholder interviews
- **Modeling & Design:** BPMN 2.0, DFD, ERD, sequence and activity diagrams, sitemap, Figma wireframes and prototypes, user journey mapping
- **Testing & Quality:** test case design, Playwright (Python), pytest, API testing basics, bug reporting, HTML test reports
- **Development:** Python, JavaScript, React, TypeScript, FastAPI, SQL (PostgreSQL), Git, Docker, REST APIs
- **Other:** Agile/Scrum, documentation for handover, Power BI (learning)

Projects

THỔ Studio — E-commerce & Workshop Booking Platform

Team Project, End-to-End Product | 2026

- Interviewed pottery artisans and scoped two systems (online store and admin dashboard) serving four user groups; documented requirements as user stories with acceptance criteria.
- Produced BPMN 2.0 and DFD process models, six detailed use cases, a 15+ page sitemap, and Figma wireframes covering checkout, workshop booking, and production tracking.
- Designed a hybrid cart for online and in-store payments and a seven-stage production tracker (Forming, Firing, Glazing, QC, Shipping).
- Built the web demo with React 18 and TypeScript (frontend), FastAPI and SQLite (backend), and Docker, and tested user flows before release.

Web Application Test Automation — Playwright

Academic Project | 2025 – 2026

- Designed and executed 40+ test cases for an e-commerce admin web application, covering functional, UI, end-to-end, and integration scenarios.
- Documented test cases with preconditions, expected and actual results, and pass/fail status; generated HTML reports for stakeholder review.

UNI-BRIDGE — Student–Enterprise Project Marketplace

System Analysis & Design Project — Team Lead, 5 members | Dec 2025 – Mar 2026

- Interviewed and surveyed four stakeholder groups and consolidated 50+ functional and non-functional requirements into a traceability matrix.
- Delivered BPMN 2.0 processes, a three-level DFD, use cases with acceptance criteria, sequence and activity diagrams, an ERD, and an interactive Figma prototype, validated through UAT rounds.

E-commerce End-to-End Analytics Pipeline

Personal Project | Oct 2025 – Present

- Analyzed 650k+ e-commerce transactions with SQL and Python, and built a dbt pipeline with 16 automated data quality tests.
- Found that orders delayed over 14 days averaged 3.1 stars, compared with 4.2 for other orders; summarized the finding as input for operational recommendations.

Experience

ShopBack — Data Engineering Practicum

Academic Industry Program | Apr – May 2026

- Contributed to a change data capture workflow (PostgreSQL, Debezium, Kafka, Spark) that stored replicated records in Parquet format.
- Added PyDeequ validation rules across four tables (primary key uniqueness, null constraints, value ranges) and configured Grafana and PagerDuty alerts.

Education

University of Economics and Law (UEL) — VNU-HCM Expected Jun 2027

Bachelor of Business Information Management — Digital Business & AI

GPA: 8.34/10 | Relevant Coursework: Systems Analysis & Design, Data Warehouse, Database Management, Business Web Development, Machine Learning

Certifications & Languages

- Google Generative AI Essentials (2026) | Google Data Analytics Professional Certificate (in progress)
- TOEIC Listening & Reading: 640 (2025)
